"ALLIGATOR" DURHAM'S DEN OF SAURIANS DRAWS BIG CROWDS

Mr. Albert Durham, he of the variety store, has a private alligator farm in the rear of his premises and also one for larger gators on the lake front. It is very interesting to watch the little fellows, especially at feeding time, and they attract lots of attention. Mr. Durham has made a business of purchasing them and has been shipping the gators to almost every state in the union.

He has about three hundred baby gators all in a bunch. They are conveniently quartered in the rear of his store in a spacious netted yard, with a shallow basin sunk into the ground and containing water enough to cover their backs. They range in size from about eight inches to two feet. The small ones are as harmless as lizards, but the two-footers already have dental parlors elaborate enough to make one rather shy about risking a digit.

Mr. Durham deposits a stack of ground meat in the center of the yard at feeding time, and it is curious to watch them form a living sunflower about the food, the live gators representing the long and slender petals while the round patch of meat in the center of a lot of bobbing heads represent the center. As the meat disappears their sides swell out in proportion, and then they lie themselves to a shady corner, pile one on top of the other and snooze the snooze of the dead.

Seven Vats Built In Osceola County

Stock raisers have certainly got a move on themselves in Osceola county and they seem determined to eradicate the tick in a hurry. A new dipping vat has been constructed at the Shaker Colony and will be ready for business today. John Padgett has also ordered the construction of a new vat for his stock. These make a total of seven vats that have all recently been constructed in the county.

Inventor Gives Demonstration of Machine Capable of Clearing Land of Florida Palmetto

We noticed last week that a monster machine was being unloaded from the cars at Kissimmee and on inquiry learned that it was a new machine with which the inventor will solve the problem of clearing land of palmetto in Florida. Traction is furnished by one motor and a second motor operates a row of revolving knives in front of the machine. There

is a action roller on either side of the machine behind the knives which rolls the ground so that the traction wheels in the rear have a smooth surface on which to travel.

Mr. C. L. Burroughs, who introduced the machine, has invited persons interested to attend a demonstration which will be given near Kissimmee this week.

BIG WAR ON FLIES IN BREEDING PLACES STARTED IN ST. CLOUD

The time has come to think of fighting the flies. Unfortunately this is a perennial task, for the flies have by no means been exterminated, notwithstanding the slaughter of the past few years as a result of organized campaigns against them. Fly swatters, fly paper and fly traps are recommended for general and persistent use. Every fly killed is a gain for health, for each fly may be the progenitor of millions of others, as well as a present nuisance.

The Department of Agriculture has declared that fly traps are the best means of getting rid of these pests, for they destroy by wholesale and are located at the points where flies are most likely to gather.

Fly catching, however, is not all that is necessary for this work for the prevention of disease spread. All the places where the flies lay their eggs and the young are hatched must be secured. Flies are bred in dirt, in old rags, in waste paper, in manure, any place where there is refuse and dampness. Premises that are kept clean will not breed flies, although they be infested with flies bred in dirty places nearby. It is to the interest of everybody to keep flies from breeding, and to this end every household and every business man should make certain of the cleanliness of the premises, and meanwhile catch every fly that can be lured into a trap.

Wireless

It is quite likely that at no distant date all the amateur wireless stations in this country will either be abolished or will be operated under strict government control, says the Indianapolis News. There have been repeated clashes between the amateurs and the navy radio men, and at times the latter have been seriously interfered with in their work by the interference of the amateurs, so that it seems that the only way to prevent this is for the government to take control, which has been recommended in a report by Capt. W. H. G. Bullard, superintendent of the navy radio service. If the recommendations are accepted the radio service will be a government monopoly.

Rev. W. H. Ball Resigns Because of Poor Health

We regret to announce that the health of Rev. W. H. Ball has failed to such an extent as to compel him to give up his work here as well as in Kissimmee and Narcoossee. He has gone to North Carolina to be with a son.

The regular lay service will be held on next Sunday at 10:30 a. m., at the Guild Hall. This will be the

last service until October 1st, unless notice is given for a special service. The Guild will meet regularly on the first Thursday in the month.

Mr. Guy S. Morgan, who arrived here on Thursday last with his family from Portland, Oregon, has purchased the Jones house on Massachusetts avenue.

Mrs. Curtis, Feared by Friends That She Would Not Survive Long Trip, Is 86 and Happy

On July 15th, 1910, there arrived in our city a worthy couple from Amesbury, Mass. Mr. R. B. Curtis was a well preserved man, but Mrs. Jennie Curtis was at that time a very feeble woman, and in fact could hardly walk a rod. When leaving their friends in Massachusetts it was considered that the trip to Jacksonville would be very severe on Mrs. Curtis and it was very likely that she would not survive the journey. The doctors, however, recommended a warmer climate and to

the Wonder City they came. Mr. Curtis purchased some land on the outskirts of the town and built a comfortable little house, and from that day to this they have lived there happily.

Mrs. Curtis is today celebrating her 86th birthday. She is able once in a while to walk up to the postoffice and to church, a distance of over a mile. We consider that Mrs. Curtis owes at least five years of her life to the fine climate of this city. We trust she will live many more years to enjoy it.

REV. SILAS COOKE COMES FROM AUBURNDAL, FLA., TO LIVE HERE

The Auburndale News prints this news item:

The Rev. Silas Cooke, D. D., after three years of faithful service as pastor of the Auburndale Presbyterian church will deliver his farewell sermon here on Sunday, June 25th and immediately afterwards he and Mrs. Cooke will remove to St. Cloud, Fla., where they are beginning a new house on the corner of Eighth street and Michigan avenue.

In answer to the inquiries of a News reporter, Dr. Cooke said that when he came to Florida over three years ago it was to visit his brother, Mr. O. R. Cooke, a prominent lawyer of Pittsburg, who was spending his winters in Orlando. Dr. Cooke had been one of the original purchasers of lots in St. Cloud when that tract was first being colonized and probably had even then an idea that it might some day become his home for his declining years. When he came to Florida about three years ago, having resigned his last charge at Early, Iowa, it was with the thought that he would then retire and settle down in this state. But at a meeting of the Presbytery he was persuaded to buckle on the harness once more and take charge at Auburndale.

There is much hard work and not very much encouragement in a field of this kind where the membership is small and where there are so many changes from year to year. But Dr. Cooke has done good work here and his influence has been felt in many ways. The good which such a man does cannot be measured by actual additions to the church membership so much as by his influence for good upon individuals and in the community. He has filled a place here in the community of his people that will be appreciated long after he has left and he and Mrs. Cooke will be greatly missed by many warm friends and admirers. Mrs. Cooke has taken active part in the work of the church, in the Aid Society and the Missionary Society and other activities and has been a faithful and active member of the Woman's Club, of which she has been the recording secretary ever since its organization.

The best wishes and heartfelt prayers of many Auburndale friends will follow this worthy couple to their new home together with the hope that they will find many new friends and pleasant experiences there.

Delightful Surprise Party Last Thursday For William T. Angel

A delightful surprise party was an occasion enjoyed by a host of friends of Mr. W. T. Angel on last Thursday night, June 15th, this date being the anniversary of his birth. The scene was Van's Boat House, which was in appropriate attire for the occasion. The entire pavilion, which is built out over the waters of our beautiful lake East Tohopekaliga, was attractively decorated with bunting, flags and palms, and quantities of flowers adorned all angles.

Leon D. Lamb presided at the piano, rendering an appropriate program of dance music, while the many friends of this popular young man gathered for the dance, which was soon in full swing, this pastime being diversified with several games at cards.

While one part of the guests were making merry up on the pavilion another was splashing about in the waters below, their laughter and shouts of joy mingling with the song of the nightbirds, to all of which an old veteran of the genus rana beat time with his unmelodious r-r-r-ump, r-r-r-ump. The combination feast adjourned at about 11 o'clock to once more caress the old eiderdown pillow

and sleep a sleep of which only strenuous exercise is conducive.

Merrymaking ran rampant, and joy was unconfined, and a jollier crowd was never brought together. It is same to say that this young man, who already hesitates to give his real age, will remember this evening for many moons to come.

Punch, ice cream and cake were served during the evening by the Misses Frances Marine and Roberta Mae Buckmaster.

The guests on this pleasant occasion included Mr. and Mrs. S. W. Porter, Dr. and Mrs. Buckmaster, Mr. and Mrs. A. G. Durham, Mr. and Mrs. Chas. Ryan, Mr. and Mrs. C. E. Carlson, Mr. and Mrs. Gordon Clark, Mr. and Mrs. P. D. Marine, Mr. and Mrs. E. C. Decker, Mr. and Mrs. Newell Edwards, Mr. and Mrs. J. E. Daenell, Mr. and Mrs. P. E. Morgan, Mr. and Mrs. W. W. Angel, Mrs. John Woodbeck, Mrs. Vandenberg, Mrs. Rose Kirkland, Roy Vandenberg, Harry Todd, Floyd Moshier, Morris Goodrich, Dr. Stewart, L. E. Hedrick, Dr. Riddle, E. H. Hedrick, Leon Lamb, Clarence Bailey, James Bailey, Van Natta, and last but not least, Lynn Dougherty.

WALKING FEAT ACCOMPLISHED BY TWO ST. CLOUD PEDESTRIANS

Being of an athletic turn of mind, Ellsworth Yeatman and Colvin Parker could conceive of no more delightful recreation than a walk to the East Coast and back, which they accomplished in five days. They carried their own camping outfit and the expense bill was so small that it looked almost insignificant. The pedestrians left St. Cloud at 8:30 Monday morning and arrived at Deer Park the following day at noon. Owing to the bad condition of the roads after they left Deer Park, they rode on a logging train to Hopkins, along the Indian river, where they arrived in the evening. All day Wednesday was spent on Melbourne Beach, and they declared surf bathing there was the most ideal. While sharks and porpoises were swimming within seeing distance they did not bother the bathers in the least.

The return trip was made in the same way, the party leaving the Atlantic coast on Thursday and reaching St. Cloud at 2:30 o'clock Friday afternoon.

The most interesting features of the trip was the employment of convicts on the road towards Melbourne, and also hundreds of men in the immense lumber yard at Hopkins.

A multitude of mosquitoes greatly inconvenienced the party while they were camping in the undeveloped section of the country, Mr. Parker stated. Altogether the trip was a most enjoyable as well as educational one, and thoroughly enjoyed.

Still Building Silos In Osceola County

Our farmers are beginning to build silos in various parts of this county. We understand that the Edgewater Farms are now operating two eighty-ton silos. L. H. Ingram and J. W. Miller have each one under construction of the respective capacity of sixty tons. J. Wade Tucker will also erect one of smaller size, probably about thirty-five tons. These are all to be built of wood.

St. Cloud's First Depot Agent Quits His Jacksonville Position To Represent Western Union

To become commercial agent of the Western Union Telegraph Company in Jacksonville, L. H. Bingham, for the past six years city passenger agent for the Atlantic Coast Line Railway, has resigned his position to take effect as soon as he can be relieved.

His associates in transportation circles regret to lose him but are pleased to know that his new position is a promotion that will carry him into a very extensive field.

Many of our St. Cloud citizens remember Mr. Bingham, who was the first agent at our depot in St. Cloud. We can assure him that we all congratulate him on his success.

OLD VETERAN ON WAY TO FIGHT MEXICANS IS EAGER FOR SCRAP

Atlanta, Ga. June 17.—There will arrive this afternoon in the city of New Orleans, unless his schedule miscarries, a 75-year-old vet of the Civil war who is on his way to Mexico to "give them Greasers hell."

His name is George Davis Roberts, and hails from Nashville, Tenn., and he is determined that Uncle Sam shall not prevent him from enjoying the satisfaction of one more real scrap before he dies.

He declares that he was denied the privilege of an engagement with the Spaniards in the Spanish-American

war because he was kept in camp at Tampa, Florida, and was never allowed to go to the fighting front.

The old man passed through Atlanta yesterday with a pocketful of money, and a large crowd that gathered around him in the terminal station was delightfully entertained with his reminiscences of the Civil war and his anticipations of the fighting he expects to enjoy across the Rio Grande.

Dog Won His Heart

"A yellow dog" was the description the policeman gave to Magistrate Levy yesterday. "A yellow dog with a good disposition," Edward Brenley corrected. "But I don't own her. She just hangs around my stable and is nice and affectionate. We call her Bowery Liz. Nobody ever thought it worth while to buy her a muzzle."

"I'll fine you two dollars," said the Magistrate. "She must be your dog." Bowery Liz managed to enter the court room at that moment and trotted up to the master of her adoption. Brenley looked at her and shook his head. "Are you worth two dollars?" he asked. "Woof," said Bowery Liz. "That's right," said Brenley. "I'll pay. You're just unlucky. You see, your Honor, last week we discovered thirteen little puppies in the corner where Liz sleeps. The number wasn't at all lucky. But somehow she acted so sort o' decent about it that I'm willing to pay the way of the whole d— family."

The Temple of the Sun

The Temple of the Sun in Kew Gardens, which was wrecked by an uprooted cedar of Lebanon in the great gale, is situated about 170 yards south of the main entrance and was built in 1761 from the designs of Sir William Chambers. It is, or was, the finest of the fanciful Georgian classical structures dotted here and there about the grounds, the most elaborate in design, and the most effective for a garden feature, says The Westminster Gazette. The center of the concave roof was decorated inside with a representation of the sun, while on the frieze were shown in bas relief the twelve signs of the zodiac. The cedar which wrought the destruction came from the Duke of Argyll's garden at Whittington and was planted when the temple was built.

EASTERN STAR CHAPTER ENTERTAINS MASONS AND FAMILIES

Last Thursday evening the Eastern Star Chapter gave a social to the Masons and their families. As each one entered the room he was given a name of a prominent person, pinned on his back, and he was to guess who he was by asking questions. Among the prominent persons who were there were President Wilson, the

king of England, Mr. and Mrs. Geo. Washington, Abraham Lincoln, Schuman-Heink, Melba, and many others. Mrs. Edd George was presented her Past Matron's jewel by Mr. Wm. Hall.

Refreshments consisting of punch and wafers was served, and a delightful time was enjoyed by all.

Boswell of City Garden Fame Attends Reunion

Mr. and Mrs. Boswell, of market garden fame, will start on the 27th on a visit to their old homes. Mrs. Boswell will go to Leslie and Clinton, Arkansas, while Mr. Boswell will go to Greencastle, about forty miles from Indianapolis, Ind., which is his old boyhood home. He left that town in 1869 and has not been back since, al-

though he has some one hundred and fifty relatives there. There will be a family reunion during his stay there. Mr. Boswell will then visit his son at Tulsa, Okla., thence he will go to Texas and Arkansas to visit his other children, and from there to Leslie, Ark., where he will rejoin his wife and return to his home in St. Cloud, which he states is heaven on earth.

DAY OR NIGHT CALLS PROMPTLY ANSWERED

RIP VAN WINKLE AS LOGICALLY RELATED BY A CORRESPONDENT

Rip Van Winkle has waked up again—Rip, one of his progeny some dozen or more generations down the line—and this time way down in South Florida.

He waked up and heard the rumble of the choo-choo cars. He rubbed his eyes and looked and beheld Florida's Health Train rolling into Fort Myers. He dug his knuckles into his eyes once more; he saw the big locomotive wouldn't bite and by degrees he screwed up his courage and entered the big Pullmans and looked at the exhibit. He looked and looked, and by and by he went away and broke into print. His impressions were reproduced by the *Estero American Eagle*, and some days later his article was copied into the *Ocala Banner*, of May 31. Of course this reprint was a joke, for it would be impossible to imagine the Grand Old Man of Florida's Fourth Estate reproducing such an article excepting in the humorous column.

But honestly, it is interesting to see how much has happened; what strides science has made, since Rip went to sleep somewhere in the 70's or 80's.

Rip was very much surprised, even disturbed, by some of the placarded announcements he saw hanging in the train, especially this one: "Smallpox is a voluntary disease. No one has to have it who cares to avoid it. Rip doubts this statement because, he says, his own father was vaccinated and later had the disease. Perhaps you were mistaken, Rip, perhaps not; perhaps it "didn't take," but that does not change the fact, Rip, that it has "taken" in thousands, yes, millions of other cases, and because of Jenner's gift to the world millions of men and women have escaped, millions of lives have been saved and the destinies of nations have been changed thereby. It's a fact, Rip, and when you have been awake long enough to get in touch with men who have all these years been awake, you'll have to change your mind.

Another carded announcement worried Rip. It reads: "Malaria is carried only by the mosquito. Bad air and miasm have nothing to do with it."

That's true, Mr. Van Winkle, in spite of the quotation you hurl at us.

HIS FIRST THOUGHT WAS ABOUT WIFE

AFTER ANDES HELPED HIM GET WELL

Was Anxious That She Should Take It, Too

If you want to interest a man, tell him something he can do that will better the condition of his wife and family.

Some men are hard-hearted and selfish, but the good fortune is that they are few and far between. When G. C. Garner, of 714 Twentieth Avenue, Birmingham, Ala., realized that Andes was doing him good, his first thought was of his wife. He wanted her to take Andes, too.

"I have been troubled with my stomach for six years," said Mr. Garner. "It affected me with dizziness, headaches and biliousness. My liver became congested and my tongue coated with offensive breath and was badly constipated."

"I despaired of ever regaining my health. I could not sleep well or eat without pain, and that was enough to make any man nervous. I had hardly enough strength to go to work."

"Since taking Andes I feel like a different person. My skin, which used to be yellow as a pumpkin, has turned to a healthy color. Andes has taken all the poisonous matter out of my system and injected new life into my veins. I can eat and sleep as well as I ever did in my life."

Andes helped me so much that I had my wife begin to use it, also. You ought to see the change in her. Why, it is wonderful! Her friends are asking every day what brought about the wonderful change in her condition."

Andes Prescription, so highly recommended by Mr. G. C. Garner, 718 20th Ave., Birmingham, Ala., is now on sale in St. Cloud by P. D. Marine, the exclusive agent.

from the Encyclopedia Britannica, which says: "The oldest and most prevalent hypothesis of malaria is that it is a specific poison generated in the soil."

Now, Van, that was all right about the time you went to sleep. People used to think that way and talk that way, even the doctors didn't know what other explanation to give, so they learnedly guessed this one out. But, Rip, "prevalent hypothesis" have given way to definite, demonstrated proofs, and while you have been sleeping your years away, the most eminent medical scientists got to studying over a few of these problems, and they found out that malaria and yellow fever, typhoid fever, bubonic plague and quite a good many of these disagreeable diseases are caused by the injection into the human system of bacteria and parasites which develop these diseases; that each disease has its own distinct microbe, and that one kind of microbe cannot generate any other disease than its own.

They went further and found that these little bugs (you can't see them, they're too small) are carried by mosquitoes or flies or fleas, which transfer them to other human beings from those that have the particular disease. And more than that, Rip, these different diseases can't possibly be started in any way excepting by the particular, individual organism that belongs to each disease. It's fact, Van, and the most learned scientific men in the world, who know a lot more about it than you or I, agree that it is a fact. It makes it a lot easier, Rip, knowing the cause of any disease, to get busy and send it off.

Now, Rip, if you will read your encyclopedia again, and more slowly, you will notice that it doesn't say that the mosquito transmission of malaria is not a fact; it just tells what people used to think—not what intelligent people like us—think and know today, in 1915.

For things have changed a lot, Rip, since you went to sleep, and the doctors have concluded that it is a great deal better, and more economical to prevent disease than to have to cure it.

Well, Rip didn't like this placard in the train: "A careless spitter with a little cough is more dangerous than a careless man with a big revolver."

Guess you didn't get the meaning of that, Van. It means that the habit of indiscriminate expectoration is more dangerous to human health and life than a loaded gun, and Rip, it's true, if you estimate it by the relative danger to the total number of victims. You know, or you'll learn after a while, that a cough and spitting may accompany a good many diseases, all the way from tuberculosis to a cold. If you don't smother your cough or your spitting or your sneezing, you may convey the germ of whatever trouble you may happen to have, to some one near you, and, happily, Van, in the light of modern ethics you haven't the right to force any of these things on any one else.

And finally Rip says: "The general effect of such an exhibit upon impressionable minds, especially those of children, is calculated to be depressing and harmful. All you have to do is to take James Whitecomb Riley's little poem and transpose the title into 'The Microbes will get you if you don't watch out,' and you get the idea we are seeking to convey."

Why bless you, Rip, that's just exactly the idea the train was put out on the rails to carry all over Florida. Sam Jones, the revivalist, once said, "It's better to scare religion into a man rather than not get it into him at all."

If the Health train was running over Florida filled up with only pleasant things, it might be better not to be running. But its mission is to show the people how to avoid disease, how to be and stay healthy, how to prevent the disaster and suffering that come with sickness.

And concluding, the writer, who is

Several New Teachers Appointed to Succeed the Retired at St. Cloud

Kissimmee, Fla., June 5, 1915.

The Board of Public Instruction met in regular session, there being present W. C. Bass, Chairman; J. S. Stratton and Walter Bronson; also C. E. Yowell, superintendent.

Minutes of the last meeting were read and approved. S. L. Luper, county treasurer, reported as follows: To the Honorable Board of Public Instruction in and for Osceola County:—

not the State Health Officer, by the way, has watched this train from the time when it was only an idea. He has visited it and carefully studied it and he has the opinions of some of the most eminent medical and sanitary authorities in this country concerning it. The expressed belief of such men is that in creating and operating this exhibit, in taking it into every part of Florida, this state is leading all the states of the Union, in its method of practically educating the people whom it reaches. It is not equalled by any similar institution on wheels, or off them, in its possibilities of lasting benefit and in its actual accomplishments. Truly, Rip, the world has moved while you have been sleeping.

James Jackson was awarded contract for building flue in the school at Mulberry Spring.

Mr. Robert Donegan having resigned his position as supervisor of school No. 31, Mr. A. R. Hemmingway was appointed supervisor in his place.

The Board decided to continue the Canning Club work during the ensuing year and an appropriation of \$500 was made to pay salary of the agent.

The following teachers were appointed for School No. 1.

R. M. Evans, principal.

Miss Leitner, English and algebra.

Miss Ledbetter, History and algebra.

Miss Clark, Latin and French.

Miss Langston, 8th grade-A.

Miss Crawford, 8th grade-B.

Miss Lola Lawler, 7th grade-A.

Edward Newton, 7th grade-B.

Mrs. F. C. Bryan, 6th grade -B.

Miss Woolridge, 6th grade-A.

Mrs. F. C. Edwards, 5th grade-B.

Miss Wilcox, 5th grade-A.

Miss Thomason, 4th grade-A.

Miss Overstreet, 4th grade-B.

Miss M. C. Bryan, 3rd grade-A.

Miss Lottie Lawler, 3rd grade-B.

Miss Clark, 2nd grade-A.

Miss Russell, 2nd grade-B.

Miss Dale, 1st grade-A.

Miss Lucy Witherspoon, assistant 1st-B.

Miss Yowell, 1st grade-B.

Miss Beals, music.

Miss Aultman, expression.

Campbell School No. 4, Mrs. Lottie Huff.

Center Park School No. 7, Miss Lillian Prentiss, subject to examination.

Peg Horn School No. 8, Miss Lottie Doolittle.

Finney Point School No. 9, Miss Edna Schweitzer.

Bassville School No. 10, Miss Emma Tyson.

Narcoossee School No. 12, Miss Katherine Shadoan.

Mulberry Spring School No. 21, Mrs. J. H. Steffer.

Wolf Creek School No. 22, Miss Ola Campbell.

Meridia School No. 26, W. S. Johnson.

Hancock School No. 27, Miss Hazel Norton.

Raulerson School No. 41, Miss Betty Phiergo.

St. Cloud School No. 16:—
Principal, R. M. Dorsey.
Assistant Principal, Mrs. Laura Lee.

High School, Paul Northrop.
Seventh and 8th grades, Mrs. Dorsey.

Fifth grade, to be supplied.
Fourth grade, to be supplied.
Third Grade, Miss Lillian Ide.
Second grade, Miss Fleda Doolittle.
First grade, Miss Iris Oliver.

The Board decided to wait until after examinations to supply the other vacancies in the county.

There being no further business before the Board, the board adjourned until June 24th, A. D. 1915.

W. C. Bass,
Chairman.
C. E. Yowell, Superintendent.

HEALTH INSURANCE AND ITS RELATION TO THE PUBLIC HEALTH

Twenty-five out of every 1,000 employees in American industries, according to recent statistics, are constantly incapacitated by sickness, the average worker losing approximately nine days each year on this account. This "non-effective rate" for the great army of industrial workers in the United States barely suggests the total money loss to employers and employees. The lessened efficiency, the effects of reduced earnings in times of sickness, as well as the cost of medical attention, and the economic loss from deaths, swell the cost to industry and to the nation to almost incalculable figures.

That much of this loss is nothing less than preventable waste and that this waste can be largely reduced by a properly conducted system of government health insurance for wage-workers are conclusions set forth in Public Health Bulletin No. 76, containing the results of a study of "Health Insurance—Its Relation to the Public Health," just issued by the United States Public Health Service.

The preventive value of health insurance is given especial emphasis in this study. "Any system of health insurance for the United States or any state should at its inception have prevention of sickness as one of its fundamental purposes," says the bulletin. "This country should profit by the experience of European countries where prevention is being recognized as the central idea necessary to health insurance if health insurance is to attain its greatest success in improving the health and efficiency of the industrial population."

Such a system, it is pointed out in the bulletin, would:

1. Provide cash benefits and medical service for all wage earners in times of sickness at much less cost than is now possible. Adequate medical relief would thus be placed in the reach of even the lowest paid workers who are most subject to ill health.
2. Distribute the cost among employers, employees, and the public as the groups responsible for disease-causing conditions and afford these groups a definite financial incentive for removing these conditions. This can be done by small weekly payments from employees, supplemented by proportionate contributions from employers and government at a rate reducible in proportion to the reduction of sickness.
3. Become an effective health measure by linking the co-operative efforts of the three responsible groups with the work of national, state and local agencies, and by utilizing these agencies in the administration of the health insurance system.
4. Afford a better basis for the co-operation of the medical profession with public health agencies.
5. Eliminate the elements of paternalism and charity-giving by making employees and the public, as well as employers, joint agents in the control of this fund.

"A governmental system of health insurance," concludes the study, "can be adapted to American conditions, and when adapted will prove to be a health measure of extraordinary value."—United States Public Health Service.

Taming the Mink

The United States Department of Agriculture is making experiments in domesticating the mink.

Well, here's luck to its efforts—but heaven help the poultryman who tries to rear his chickens near that experimental farm. The mink has for as fine as the most exacting lady could desire, but his disposition is as bad as that of a Villista bandit, and he has at least as much cunning. He can dig his way into any inclosure not made of brick or stone or concrete; he loves blood as well as a weasel; he has a perfect genius for evading traps, and he can conduct his depredations so skillfully that for months and even years they will be laid to other marauders, and only the closest observers will know that there is a mink in the neighborhood.

The man—or the department—which undertakes to tame such a creature has a large self-confidence.—Chicago Daily Journal.

Four Reasons Why Florida Is Forging Ahead of California

ORANGES

As per promise I made in my last letter that I would write you about the famous Florida oranges, I hope you will not think me presumptuous when I say there are oranges raised in the South from coast to coast, but there are no oranges anywhere that excel the Florida product in flavor and juiciness. Florida is conceded to be the best state to raise oranges. The Florida orange is conceded to be the best fruit in America. Why? Because both are facts. The Florida orange weighs more. Which proves the California orange, though widely advertised, is insipid and less juicy.

In a recent issue of the Riverside (Calif.) Press a writer, who has been handling California oranges for many years, declared that the Florida orange crop has been large, fine and sweet, while California oranges have been sour. It takes 50% California 200-size navels to produce one gallon of juice. To produce the same quantity of juice it takes 34% Florida oranges. Therefore, the latter fruit is not only sweeter but also more juicy than the California navel.

California bars the Florida oranges and here is the why of it: Because its superior quality, or because of the fear that it may create a great demand after it is extensively introduced. The orange devotee buys it for the juice it contains and the old adage "The proof of the pudding is in the eating" may be applied to the Florida orange which has stood the "acid test."

The more the Florida orange is advertised, especially in the West, the greater the demand for it will be and the less the California orange will be raised. Of late the citrus fruit growers in California have agitated the substitution of olives and nuts for oranges as a more profitable industry.

That the Florida orange is the heaviest, sweetest and juiciest is conclusively proven by the preponderance of evidence contained in these following testimonies:

"My experience in Southern California and here satisfies me that this is a far better citrus fruit country than California. The fruit is of better quality."—John E. Greene, formerly of Los Angeles.

"People who know, tell me that the grapefruit grown in this section are almost equal to the famous Florida grapefruit. As a matter of fact, the best grapefruit I have ever seen in the markets here correspond to Florida mills and seconds. Of course the California navels are fine."—J. F. Schumann, in an excerpt of a letter written from Los Angeles to Orlando, Florida.

"The California oranges are thick-skinned and pulpy, without much juice and I did not like them."—Mrs. J. J. Hooley, of Los Angeles, who remarked while wintering at Clearwater, Fla., that the Florida fruit was so much sweeter, juicier and thinner-skinned than the oranges of California.

"Whatever may be said about the superiority of the oranges, it is admitted by every person that Florida's grapefruit is superior to any in the world, and that this state stands practically alone as the grapefruit producing section."—Hon. Peter O. Knight of Tampa, who investigated the situation in Southern California.

"We didn't know what an orange tasted like until we ate one of these. They are sweet and juicy and have an entirely different flavor from the California kind."—Warren Baker, editor of the Wilson World, Wilson, Kansas, who received a box of oranges from Sarasota, Florida.

"Some California fruits are good. They produce fine peaches, grapes and olives. The oranges are thick-skinned and tasteless, or too sour, as compared with the sweet russet-coated beauties that the Northern man finds on the peninsula. People eat oranges in California because they are delicious. The regulation breakfast dish is half a large grapefruit eaten with a little sugar."

During the day oranges are eaten at any time that one happens to be passing a grove or fruit stand. Many people who seldom eat oranges in the north, because they see only the California product, soon get to eating them on their arrival in Florida. Quality is the only explanation."—Bloomington (Wis.) Record.

"After the fruit reaches the market Florida outdoes yours during the past season in pretty nearly every case, which is conclusive evidence that Florida grows the better fruit."—M. E. Gillett, of Tampa, in an interview with a large grower in California.

"In our estimation the California orange business is simply going to be a survival of the fittest, and a grower who does not raise a good fruit and a packer who does not take pains to pick and pack carefully and handle

in first class shape are going out of the business. As long as Florida has the quality of fruit that they have today, a grower and shipper in California has to get on the job and stay there."—Arthur S. Westfall, who has spent the last twenty years exclusively handling California oranges at New York City.

"Florida is the second largest state in the growing of citrus fruits, California being the largest, but Florida excels the world in quality of her fruit."—W. A. McRae, Commissioner of Agriculture of Florida.

"No country grows better citrus fruit than Florida. The flavor and juiciness of the Florida orange are far superior to the California fruit product."—Will H. Craig, of Indianapolis, in one of the paragraphs of his letter from Orlando, Fla., to the Indianapolis Star.

(To be Continued Next Week.)

Out-of Way Isle Visited

From Mrs. Scoresby Routledge, who has reached England after a three years' cruise in the Pacific on board the little schooner Mana, Reuter's Agency, says the London Chronicle, has received some details of a visit paid to the remote Pitcairn Island, whose inhabitants are the descendants of the mutineers of the *Beatty* who colonized the island in 1790.

The place is too remote to be visited by the small trading vessels which ply among the neighboring group of islands, and it is only at extremely rare intervals that a warship is detached to call at this little outpost of the British empire.

On the Mana being sighted a boat was rung and a boat was filled with sturdy men, European in appearance, but of a sallow, white complexion, who rowed out and, in good English, invited Mr. and Mrs. Routledge to land.

They were told that the next day would be the Sabbath, which was surprising, as the day was then Friday. The visitors landed in a small cove reached through drenching surf, the boat assuming an almost perpendicular position. On clambering up a steep path cut out of rock the strangers were greeted by a group in white Sunday attire. Service was held in accordance with the tenets of the Seventh Day Adventists, and during the sermon the preacher predicted that the present war was only the beginning of the trouble in store.

Tobacco, alcohol and pork are forbidden, and the use of tea and coffee is discouraged. The whole atmosphere of the island was as if a Pacific island were suddenly transported to Puritan England or bygone Scotland.

Unstinted hospitality was given to the visitors, and the whole male population worked gratuitously on excavating prehistoric sites for two whole days. Meals of an attractive but primitive kind were given in the little wooden houses of the islanders.

Mrs. Routledge says that the standard of life of Pitcairn is distinctly higher than that of an English village. The island is administered by a "Lower House," comprising a chairman and two members, but is subordinate to "The Council," consisting of the chief magistrate, with two assessors and a secretary.

When the Mana left Pitcairn she brought away two islanders, who are now on their way to England.

Birthplace of Abe Lincoln Deeded

The United States government will accept a deed of conveyance from the Lincoln Farm Association of the Lincoln homestead, including the log cabin in which Abraham Lincoln was born, near Hodgenville, Larnie county, Kentucky, by the terms of a bill passed recently by the Senate. The bill already has passed the House. It was amended slightly in the Senate.

The bill also provides for acceptance by the government of an endowment fund of \$50,000 to go with the Lincoln homestead. The government guarantees on its part to keep up the grounds and the memorial hall thereon, containing the log cabin in which the war president was born, as a public park.

Declarations that any nation foolish enough to attack us will be whipped are wholesome expressions of patriotic faith. The only thing that remains is to be prepared to make good.

LOW ROUND TRIP SUMMER RATES FROM JACKSONVILLE

SOME CUTE BLOCKADE TRICKS--TRUE STORIES--BY A BLOCKADER

Tumbling over the waves on her way back from a "search" game Seascraper's boat. She tied up alongside and her crew scrambled inboard along the boom.

"Bill, here's something to put in your soup," called one of them to a messmate, holding up a large onion. "Right you are; pick it here," answered Bill, extending a huge, work-hardened palm. Whizz, came the onion, which touched Bill's horny paw, rebounded from it, struck the edge of a table, and then went bounding along the mess deck like a ball.

The alleged "onion" was made of rubber and had been brought back as a curio by one of the search party from the ship that had just been overhauled, and aboard which there were many bushels of other "onions" exactly like it. All sorts of clever devices are adopted to try to get contraband through the English blockade.

But hard war experience has taught our patrol service not to accept things as being just what they seem—no matter how guilelessly like them they may appear. In this particular case, when the vessel was boarded many sacks of onions were found among her cargo. Most succulent oniony onions, too, they looked, and the crew opened the sacks quite confidently.

However, when the examining officer picked up one of the onions at random and dropped it on the deck it bounced back into his hand—and the game was up. Except for a few real ones spread carefully at the top of the sacks, the whole of the "onions" were made of rubber. They were undoubtedly on their way to Germany through some neutral port, but the discovery of their real composition meant confiscation, and the wily Hun got none of these "vegetables" for his war broth.

Long months spent in countering the wiles of clever tricksters have made the crews of our blockading ships the most suspicious on earth. And not without good cause do they decline to judge by appearances only. Yet with all their astuteness they sometimes come very near to being deceived.

Would anyone think that rich, juicy honeycomb, with honey dripping from it, could be anything than—well, just rich, juicy honeycomb, made by the busy little bee, whose habit of improving each shining hour, receives so much praise from poets, philosophers and others who are more given to talking than working themselves? Our naval patrol service can tell you that there is a kind of honey made by bees which do not buzz while they

labour, although they try to "improve each shining hour" well enough. Specimens of it are occasionally found in the blockade area. As usual, it was first unearthed in a ship that was being searched for contraband, and so good was the imitation that the "honey" had a chance of getting through.

Part of the vessel's cargo consisted of case after case labeled "pure honey." This turned out to be pure fake—but that is getting rather ahead of the narrative. When the cases were opened they were found to be filled with the familiar little square boxes of comb with honey—or what looked like honey—running out of it. One inquisitive sailor tasted this, made a grimace, and tasted again; then he wrenched a comb from the box and dropped it on the deck—and lo! it bumped up and down there right merrily. Closer investigation revealed that the combs were built of rubber and had been filled with some sticky, honey-colored substance to make it resemble the real thing, as they did to the life. A clever idea this for getting rubber into Germany, though it failed.

But rubber is by no means the only substance which the exponents of contraband tricks endeavor to get through. Germany wants copper badly, and there are always people trying to supply her with it. Some of them hit upon an ingenious plan and it seemed to promise certain success. Instead of being hidden in the ship the copper was clamped to her bottom. Apparently the consignor thought that, however closely the British navy might search the interior of a vessel, no one would have notes enough to think of examining the outside of her below the water line. But they had. One sailing vessel when intercepted and overhauled was found to have a great quantity of copper fixed along her keel. Into harbor she went and the copper was seized.

Going through one ship the searching party noticed that her bulkheads were abnormally thick. "When in doubt investigate" being the principle upon which the examination service is run, the bulkheads were ripped open and quite an extensive arsenal discovered inside them. Rifles and ammunition galore had been secreted there.

Hollow masts filled with petrol were part of the "find" in one tramp picked up in the blockade area, and her double bottoms were also stuffed with contraband.

Since cotton became contraband, all sorts of ingenious devices have been (Continued on Page Seven)

Senator Bryan's Opportunity

Senator Nathan P. Bryan now has an excellent opportunity to be of the greatest possible service to his country.

The Senate Naval Affairs committee, of which Senator Bryan is a member, within a few days will have under consideration the House Naval bill. The House Naval bill appropriates for five battle cruisers, twenty submarines, and a number of auxiliary craft, but it does not make any appropriation for dreadnaughts, which the recent North Sea battle between the Germans and the British show to be an imperative necessity to any navy.

If the Senate Naval Affairs committee adds to the House bill four dreadnaughts, or even two, and one additional battle cruiser, the American navy will be well started toward obtaining second rank among the navies of the world.

Aside from a sentiment of patri-

tism and the general wish to see the United States navy occupying at least second rank among the navies of the world, Floridians have a peculiar duty in this respect because of the immense sea coast of Florida. The only defense for Florida's exposed sea coast is a strong navy, a navy strong enough to defeat the fleet of any other nation, which would prevent landing of an enemy on the Florida coast. A weak fleet would inevitably be defeated and the coast of Florida would then present an inviting field for a foreign invader.

As a member of the Senate Naval Affairs committee Senator Bryan's voice and influence will have a great weight in the deliberations of the committee on the House Naval bill.

It is Senator Bryan's plain duty to his state and to the country to stand firmly in the committee of which he is a member, for the dreadnaughts and the additional battle cruiser.

Waste Paper

We have been writing continually in the last few numbers suggesting that people save all their waste paper and during the last few days further matters have come to light showing that the advice we have given is good and that it should receive prompt attention and that steps should be taken to collect these old newspapers, and in fact, any other old paper or old books. The value of paper, that is to say the cheapest kind of news, has increased during the past month twenty-five dollars per ton, which would mean that the plain paper that is used for each annual subscription to the St. Cloud Tribune would cost the printer approximately about 50c per subscription. This, without cost

of handling, ink, composition, writing, and other expenses. Higher prices are furthermore predicted and it is also stated that the supply today is hardly sufficient to supply the demand. Some papers have already been compelled to advance the price of subscriptions and within a short time all will have to do so.

We have been asked several times of late by parties who have been accumulating their papers why someone has not been around to get them, so many have thrown several hundred pounds away, as so little interest has been manifested. At one residence that we know of over 400 pounds of paper was destroyed during the past week, as the housekeeper got tired of seeing them around.

On the Signature of Deeds

The notaries of this state and especially of St. Cloud, sometimes experience a great deal of difficulty and trouble over the manner in which deeds from other states are received when property in this state is to be transferred and therefore deeds placed on record here. In some states no witnesses are required except the attestation of the Notary. In other states only one witness is required, while in Florida two are required. In some states the expiration of the commission of the Notary has to be affixed as well as his seal, and in oth-

ers this is not required. Deeds for record in Florida have to be made out according to the laws of this state, which governs them and therefore a large number of deeds have to be returned for correction, or if recorded as sent are liable to be contested. Wills, also, in some states require two witnesses and in this state they require three. It would seem that a law governing all the states in the Union would be of great help, not only to the notaries, but would save a great deal of controversy to the public.

Compulsory Education

A good deal of attention is now being paid to compulsory education in this state. As matters stand it is optional to each county to vote as to whether this should be enforced in each respective county or not. We consider that this law should be a state law and that education should be compulsory in every county. There are many children who come here for the winter months with their parents and who are of "school age,"

and as we have excellent schools here and first class teachers it would seem to us that these children ought to attend. This would also be of advantage to our town as it would bring up the attendance average and it would also keep a good many children off the streets. We would suggest that when it can legally be done that a voting clause should be put in at the first election to see what the sentiments of the citizens are on this subject.

Editoriales

The Fourth of July oration will be made by Mr. Lewis O'Brian, of Kissimmee. Mr. O'Brian is a very able speaker and we feel sure that the oration will be a good one.

The preparedness parades on Flag Day proved a great success. In the city of Washington the parade led by President Wilson numbered 35,918 people, and all societies and every class of life was represented. This would amount to about one in ten of the entire population of the city. It is reported that in the parade in Chicago one in twenty, and in New York one in forty of the total population were in the march.

The new South Florida and Gulf Railroad will open for traffic twenty-three miles of their new road running from Keenansville to Prairie Ridge on the 29th inst. This road will even-

tually be extended to Okeechobee, a total distance of fifty-five miles from Keenansville. This occasion will be celebrated by several hundred visitors from Osceola and the surrounding counties. The main feature will be a gigantic barbecue prepared by Dan Prescott, who is an expert at that business.

This new railroad will open up a large section of excellent prairie land hitherto but little developed.

This is the best time of the year for the prospective land buyer to visit Florida. He will then be able to see that our summer season is a delight. He will experience our summer thunder showers and rain storms and will learn that they are refreshing and are welcomed by the residents, and he will be able to view the land at a time of the year when there will be water standing upon it—if ever—Florida Grower.

matters have now arrived at a stage in the dealings of the United States with Mexico that there seems to be but little doubt that the United States would be drawn into the struggle whether they desired it or not. The last peremptory demand of Carranza for General Pershing to withdraw the punitive expedition has not met with favor as a general thing in this country and there seems to be but one thing to do, and that is to uphold the policy of the president and to enforce the punishment of the bandits either with or without the sanction or help of General Carranza.

There are now about 38,000 troops in Mexico and about 12,000 more regulars who are ready to cross the line at a moment's notice. The National Guard all over the country has been called to arms and they are responding with an alacrity that is far beyond

expectations. Within four days there will be a further 100,000 men ready to move to the boundary for defensive purposes and all train arrangements have been made so that they will be delivered at their various destinations within a very few hours of their departure from their camping grounds.

Washington has taken its stand and must now show that it can and will enforce its rights and just demands without further equivocation and the time has arrived when Carranza must either take back water or suffer the consequences.

The Kissimmie company, Company B, Second Regiment, F. N. G., left for Jacksonville last night under the command of Capt. Edgar Katz. They will proceed immediately to Black Creek Camp to be placed in readiness for service at the front or on the boundary, as circumstances may require.

EDITOR'S MAIL BOX

BY OUR READERS

We have received a letter from our old friend H. J. Miller renewing his subscription to our paper. He says "we have spent two winters in St. Cloud and we did enjoy ourselves—never home-sick one minute. How we would enjoy to spend some more time in your city and climate."

I do not wish to be without the means of being posted about St. Cloud as I am interested. I spent January and February of 1915 there and hope to see the place again soon. Enclosed please find subscription renewal.

Wm. M. Vickery.

Somerset, Ky., June 14, 1916.
Editor Tribune—

Having a very pleasant time. The weather is splendid, but "No Place like St. Cloud, the Wonder City!" I doubt if we can stay until late fall as planned. Regards to all.

W. N. Garner.

Brownstown, Ill., June 6, 1916.
Editor Tribune—

As many of Ralph Rode's old pals would like to hear of him I will say the Dean of Dentist Department of the St. Louis University told me your son has made so good we will keep him here to help us in the college. He graduated June 3, 1916. The auditorium was overcrowded to see the lawyers, D. D. S., and M. D.'s receive their diplomas. Mrs. Rode and I witnessed the ceremony and were happy over the good report.

Hard rains here last night and today. Florida fever has already started with us. Next winter if we get there there will be eight of us.

Respectfully,

Samuel W. Rode.

New Concord, O., June 6, 1916.
Editor Tribune—

I have spent one winter in your city and believe all you claim for it. I have also read the Tribune for the last six years and have noted that scarcely an issue comes from the press which does not contain an article of some description boosting your climate and weather. This subject will stand a great deal of boosting and many of the people are making the most of it. I will endeavor to give you some weather as experienced in Southeastern Ohio.

We have had a very disagreeable year as to weather. Last summer it was very cool and wet, which was not only inconvenient but caused great loss to farmers and fruit growers not to mention autoists and amusement managers. The excessive moisture

caused many kinds of fruit to decay when put away for the winter and other crops rotted on the trees, such as plums and cherries. The cool weather was a drawback to crops, making a late harvest, and much of the wheat was overripe when harvested and fell from the head because binders could not be operated in the wet and muddy fields.

The winter has been worse than the summer because of so much sickness. We had very little cold weather, which was not as pleasant as it sounds. The winter was marked by a very great range of temperature and much rainfall. Following is an example of temperature: On January 13 it rained all day and at 2 p. m. the thermometer registered 72 degrees, very warm for January. And on January 17 the mercury went to 8 below zero; a change of 80 degrees in less than four days, or a greater variation than you will have in a year.

These conditions caused much sickness, such as colds, grippe and throat trouble, and many deaths resulted.

Business was damaged to a greater or less extent for the same reasons as the roads were very bad during this period and it cannot be denied that bad roads hurt business. Many merchants were unable to dispose of their stock of heavy clothing, as the mild winter did not cause the usual demand for it, so they will be compelled to carry it over, which is a losing proposition. But with all this loss of business we must bear in mind that it is an ill wind that blows no one good. The doctors and undertakers had a very successful season.

Now this has been an exceptionally bad year and may sound awful to many of you in the South, yet we have some very fine weather at times but such periods are short and not to be depended on. It is said of our weather, and very true, that it is never monotonous.

During the last few weeks we have had some very warm weather in which the humidity was great, "close," we call it. Although we had a frost on May 18th, which did not kill anything but may cause the fruit to drop when about one-third matured. The weather at the time this is written, June 6, shows indications of being a repetition of last summer.

I have written the foregoing not as an argument or advertisement, but simply as a record of facts as have occurred and for the purpose of giving you an idea of what we enjoy and endure in this climate, and it may cause you, of the South, to appreciate your own climate to a greater degree.

Carl C. Strahl.

PRESIDENT IS GRATIFIED OVER RAPID GROWTH OF BOY SCOUTS

President Wilson today signed the bill passed by congress incorporating the Boy Scouts of America, which the officers of the organization say will greatly help them in protecting the movement from exploitation and unauthorized use of the name and emblems.

The bill was signed in the presence of Colvin Livingston of this city, president of the organization; James E. West, now of New York, chief executive officer; Representative Carlin, who had been instrumental in having the bill passed; H. H. Grogan, H. C. Moses, L. H. Brooks, and other District Boy Scout officials, together with nine of the ranking Boy Scouts of the District—L. Harrison, Troop 21, M. Shoemaker and Edward Sherry, Troop 37; Claude Aver, Troop 37; Stewart Kann, Troop 10; Howard Wilkins and Max Tracy, Troop 42, and Cecil Gensinger and Ulrich Gensinger, Troop 30. Harrison, Shoemaker and Sherry are eagle scouts. The president congratulated the

nine scouts upon their appearance and their high rank, and when told by Mr. West of the great strides the organization is making in adding new members, said "Bully!"

Mr. West dwelt upon the movement as an agency for preparedness, saying there are today 182,982 boys in good standing in the organization, with 43,000 men as leaders, a total of 225,982 men and boys.—Washington Star.

A Swiss inventor has developed an aluminum pencil to write on glass or porcelain, producing marks that can be etched with hydrochloric acid or burnished to resemble inlaid silver.

Measures have been taken by the Dutch authorities to prevent the extermination of birds of paradise in the Dutch East Indies.

Emperor Francis Joseph of Austria, possesses an opal for which he once refused an offer of \$250,000. It weighs seventeen ounces.

just received. These are some of the latest creations of the season, made of Striped Crepe, Flowered Crepe, Woven Ratine Crepe and Lawns in neat figures. Every style is trimmed with either Swiss Embroidery, Bonnaz Embroidery or Hemstitched Collar of voile and organdie. Exceptionally good values for \$1.25 and \$1.50.

A few more popular sport hats for women, pink, blue, tan and striped, 50c and 75c.

The Store of Good Values

NEW COMPULSORY SERVICE BILL TO PUT ALL YOUNG MEN IN ARMY

Washington, D. C.—Details of a new universal military training and service bill to be submitted to congress soon was made known today. It provides that all male citizens shall enlist for six months' military training during the calendar year in which they become eighteen years of age and thereafter shall be discharged into the reserve. In times of war these trained men might be called into active service by classes of years, the youngest first.

The bill was drawn by Capt. George Vanhorn Mosely, of the general staff of the army, acting officially in behalf of national defense organizations.

It is proposed as a substitute for the pending Chamberlain universal training bill which provides for short periods of varied training extending over ten years between the ages of thirteen and twenty-three. Arrangements will be made for the passage of the measure at this session of congress, it is said.

The only exemption from training it is said are those physically or otherwise unfit and men of the permanent military or naval forces. Military training in schools would have bearing on the six months' compulsory training, with the limit of exemption placed at four months.

Two Automobiles

One was a wonderful sixty-horse car with a driver in buttons and braid. It glided along past the press of the throng.

With its passengers out on parade. She was a beauty, who blinked on that ride.

But happiness wasn't invited. The other car puffed as it struggled along.

With mother and kiddies galore. The patient old sun took a peep at their fun.

Then seemed to warm up even more. And happiness came to join in the game.

And shout to the heaven above. And never a slip could spoil this glad trip.

For the name of the driver was Love.

—Wm. F. Kirk.

A Clever Ruse

A submarine commander, the Popular Science monthly says, lost his one means of judging the speed of the vessel to be attacked—by noting the size of the bow wave thrown up by the intended victim. The correctness of the estimate means either a hit or a miss. To deceive the submarine in this matter British ship commanders have devised the clever ruse of painting a huge bow wave on the side of a ship, rendering it extremely difficult for the undersea craft to judge the speed accurately.

"It's a waste of time to worry over the time you have wasted."—Houston Transcript.

China is the only other country besides America in which the alligator is found.

ILLMAN CO.

"Store News" Letter

To Our St. Cloud Friends—

In my letter of a week ago I promised to explain in this week's letter what co-operation is and what it is not. After thinking over the matter I concluded to defer for a time that discussion, and in this letter tell of the perils of credit, all of which are avoided by co-operation. 1st, credit in its demoralizing influence is next to the terrible drinking habit. Credit does not encourage thrift. Credit degrades the individual by a consciousness of wearing unpaid-for clothing, or of owing for food that has produced the flesh on his bones. Credit keeps a man dependent and at the mercy of others. Credit increases the cost of living at least 25 per cent. Credit inflicts upon the community a frightful tax for the support of accountants and others, and this tax falls upon the consumer. In a word, the great object of co-operation is by insisting on cash payments, to encourage living within one's means, to save spending unnecessarily, to accumulate capital, and thereby elevate life and improve social position. The purpose of "Our Store" is to sell for cash and to keep down the high cost of living. To succeed in this laudable purpose we must have your co-operation as proof of our determination. We will begin on Monday, June 26th, with a special for one day only, to be followed by weekly specials.

On June 26th we will sell—

12 pounds Sugar for....\$1.00	1 doz Layer Cake for....25
6 loaves of Bread 25	3 cans Corn 25
3 pounds Rice 25	6 pkgs. Grandpas' Soap, 25
10 pounds Cornmeal 25	6 cakes Lenox Soap 25
1 pound best Coffee 25	3 pounds Onions 25
3 pounds Crackers 25	1/2 pound Tea 25
6 cans Milk 25	3 cans Peas 25
2 pounds Prunes 25	3 doz. Cakes 25
Special, one day only, \$5.00 cash order.	

Our special for next Saturday will be Honey Cake. Something new; try it. We think it will please you. Come early and avoid the rush.

Fire insurance, taxes, A. E. Drought.

S. W. Porter, real estate, insurance.

Dr. Riddle left yesterday morning for Orlando to attend the State Dental Association convention in that city.

Safety Pins, 2 cards for 5c. Durham's Department Store. 43-11

An advertisement in the Tribune pays a hundred per cent on the investment.

White Leghorn chickens for sale. Apply at Mrs. Kreps, Penn. ave and 6th st. 43-21P

Mr. I. C. Ford left Tuesday for Trenton, Mich. He is taking his usual summer trip and will return here before fall.

Remember the Big Suit Sale closes Saturday, June 24. Durham's Department Store. 43-23

J. I. Cummings has disposed of his interest in the passenger boat Mand to Captain Cope, who is now sole owner.

H. D. Brainerd and family left here on Tuesday last for Escanaba, Mich. They will return here in the month of October.

Guy S. Morgan and family, from Portland, Oregon, arrived in town on Thursday last and are guests at the Bonair House.

Mrs. R. E. Slauson, who is at present residing with Mrs. Dr. Cushman, on Florida avenue, called at our office on Friday last.

Dr. Riddle, the dentist, leaves on July 2nd for the North to take a post graduate course in dentistry. He will be gone about four weeks.

Mr. Munroe Johnston, who has been here for quite a while, left this morning for Ft. Wayne, Ind. He will return in the month of October.

The Fords (not of the Rocky Ford variety) are getting popular these days. Chas. Rothrock is the latest possessor of a handsome Ford.

One-pound cans Talcum Powder for Saturday. Durham's Department Store. 43-11

The new concrete house on Kentucky avenue being built by W. J. Malter for Mrs. Sophia Mayer, is well under way and when completed will be quite an addition to our town.

The latest feature in movies—the Selig Tribune. It is a newspaper of pictures from all over the world. Every Tuesday at Palm Theatre.

Mr. S. W. Porter is a thorough business man. He has recently had the windows of his office redecorated with artistic signs. They are a decided improvement and show up well.

Mr. and Mrs. C. B. Hughes left on Tuesday for Knoxville, Tenn., where they will reside in the mountains for a few months. They propose to be back here the latter part of September.

There are values in every department at this sale. Nothing reserved and the reduction is still -Off. Durham's Department Store. 43-11

Arrangements have been made with Mr. McKay to collect and store waste paper. Send what you have to his store or advise him and arrangements will be made for the collection of same.

We notice among the departures for Jacksonville on the A. C. L. excursion of the 21st, Judge S. D. Decker, who is called to that city on a railroad case in which several thousand dollars are involved.

Our old friend W. T. Cameron has written us from Wyoming, Iowa, that he has been in that city a month and that he is lost without the St. Cloud Tribune and requests that it be forwarded to him regularly.

Only two more days of the 1/4-Off Sale. Durham's Department Store.

There will be preaching at the Presbyterian church on Sunday morning, and arrangements have been made for continuous service hereafter.

Lieut. Wilbur F. Cogswell, of North Beach, Md., arrived in town this morning. This is Comrade Cogswell's first visit to St. Cloud.

Comrade and Mrs. Marskie have at their home a unique collection of badges that are displayed around one of the rooms in their house. These they have themselves collected at the various national, department and county reunions that they have attended. They are all G. A. R. and W. R. C. badges and number considerably over one hundred.

Safety Pins, 2 cards for 5c. Durham's Department Store. 43-11

Comrade Levi Shambow writes us from Monida, Mont., wishing to be remembered to all the boys. He reports that crops in that section are about two months late and that the mountains, June 16th, are still covered with snow and that there are still many snowdrifts on the low lands. He concludes his letter by saying "Of course, W. G., the country looks good to me, but no more winters for me in this country."

Monday is "Hazards of Helen" day, the great railroad series, featuring Helen Gibson. 43-11

Comrade John E. Neary, formerly of the 33rd N. T. Inf., arrived in the city on Thursday, the 15th, from Lansing, Mich., accompanied by his wife and daughter. They have been guests at the Farris House. Though there only a few days they are so well pleased with our city that they have purchased the Daniels house, corner of Virginia avenue and Eleventh street, and are now moving their furniture into that house. Comrade Neary tells us that he has long wanted to come to the Wonder City and now that he has arrived he is far from being disappointed in the town.

Golden Rule Girls

The regular meeting of the Golden Rule Girls was held last Friday at the home of Mrs. Northrop. It was decided that the club should pay their share toward the upkeep of the tennis court and that any one in town is welcome to go and play on it. It is free to all.

After the regular business had been transacted new officers were elected, as follows:

President—Kathleen Goff.
Vice President—Eleanor West.
Secretary and Treasurer—Gladys Saunders.

Corresponding Secretary—Ruth Blech.

Marion Harmon was then admitted to membership in the club.

The next meeting will be held on Friday, at two-thirty, at Mrs. Northrop's.

V. M. H.

The Royal Neighbors

The Royal Neighbors extend an invitation to St. Cloud people to attend a lawn party at the residence of Mr. and Mrs. Edd George on Tuesday, June 27th, at 7:30 p. m. Ice cream and cake will be served. Please come one and all.

Per Committee.

Daughters of Vets

At the regular meeting of Mother Bickerdike Tent No. 1, Daughters of Veterans, on Tuesday afternoon, one new member, Mrs. Dollie Lawton, was initiated. Though several members have been lost by removal, we are still gaining and expect more after the summer vacation.

Among other matters of business attended to was the appointment of a committee of three to arrange the D. of V. part in the Fourth of July celebration.

The next regular meeting will be held on the third Tuesday afternoon in July, as we shall hold only one meeting next month.

C. R.

Censorious

An old tenant on Queen Victoria's Balmoral estate used to be greatly concerned when the queen went driving Sunday afternoons. She even ventured to speak about it. The queen, who allowed a good many liberties to her tenantry, smiled and said to the old woman:

"But, Janet, the New Testament tells us distinctly that the Sabbath was made for man."

"Aye," said Janet, severely. "I know it does; and I think none the more of the New Testament for that." The Bitts.

BADGER STATE ASSOCIATION IS NAME OF NEWLY FORMED CLUB

Wisconsin folks gathered at the home of Comrade and Mrs. Marskie on Thursday last for a Wisconsin picnic. The afternoon was spent in social converse and was enjoyed by all. At five o'clock the host and hostess invited all present into the dining hall, where covers were laid for eighteen, and where were found tables loaded down with every good thing imaginable to eat, which proved that the Wisconsin folks had not forgotten how to cook, even if they do live in far-away Florida.

A dish of cucumbers was passed around several times and many remarked that they tasted like Wisconsin and were anxious to know where they came from. After a pause Sister Mason, with her usual modesty, acknowledged that they were grown by her and were put up at her home in Wisconsin.

The good eats were too numerous to mention but certainly Sister Marskie knows how to put up a good meal and serve a splendid cup of coffee.

Mrs. Stilwell moved a rising vote of thanks to Comrade and Mrs. Marskie. It developed afterwards that those present had something on their minds outside of the feast, and it came to light unexpectedly by some one proposing that a Wisconsin Association be formed to be known as the "Badger State Association." This was quickly done and it was agreed that it should meet monthly on the

third Thursday of each month. The next meeting is to be at the home of Comrade Mason, on Florida avenue, at 2 p. m.

The following officers were then elected: President, Capt. H. A. Sheldon; First vice president, N. A. Stilwell; Second vice president, Mrs. Van Arsdale; Third vice president, L. Williams; Secretary, Mrs. Theo. George; Treasurer, H. H. Mason; Corresponding secretary, Mrs. Ansbrough. It was decided that the prominent feature of the association should be "Sociability."

Those present were: Theo. George, 50th Wis., and Mrs. George, Union Grove, Wis.; T. F. Van Arsdale, 30th Wis. Inf., and Mrs. Van Arsdale; L. Williams, 32nd Iowa, Co. B, and Mrs. Williams; Mr. and Mrs. Ansbrough, of Washburn, Wis.; H. D. Brainerd, Co. D, 39th Wis., and Mrs. Brainerd; Mrs. T. M. Martin, Capt. H. A. Sheldon, Co. C, 1st Wis. Inf.; H. H. Mason, Co. D, 10th Wis. Inf., and Mrs. Mason; Z. B. Stilwell, Co. I, 42nd Wis. Inf., and Mrs. Stilwell; Mr. Marskie, Co. H, 13th Wis. Inf., and Mrs. Marskie; also Mrs. Vina Beebe, daughter of Mrs. L. Williams, of Syracuse, N. Y.

We had a most enjoyable time.

One Who Was There.

Mr. and Mrs. H. H. Williams left last Monday for Asheville, N. C., to be gone for two or three months.

All Honor to Girl Who Works

God bless the girl who works! She is not too proud to earn her own living, nor ashamed to be caught at her daily task. She smiles at you from behind the counter or desk or printer's case. There is a sweet memory in everything she touches. She is like the brave mountaineer, already far up the precipice, climbing, and struggling and rejoicing. The very sight is an inspiration. It is an honor to know this girl and to be worthy of her esteem. Lift your hat to her, young man, as she passes by. She's a queen in the realm of womanhood. She's a queen among the toilers. Her hand may be stained by dishwashing, factory grease, or printer's ink; but it is an honest hand. It stays misfortune from home; it supports an invalid loved one, maybe; it is a moving, potent shield that protects many a family from the poorhouse. All honor to the brave toiler! God bless the girl who works.—Nichols.

Gained 450 Lbs. in Five Years

A victim of elephantitis, for which there is said to be no cure, Mrs. Annie Frey, thirty-four years old, died late Tuesday night at her home, No. 712 East Twelfth street. At the time of her death she weighed 500 pounds. Because of her weight for eight months Mrs. Frey had been unable to leave her bedroom, the doors being too narrow. When she retired it required the efforts of nine persons to lift her into bed.

For the burial on Saturday an undertaker had constructed a special coffin and it was necessary to reinforce a hearse to carry the body to the cemetery. In order to get the coffin from the apartment, which was on an upper floor, one of the windows had to be torn out and a derrick erected upon the roof to swing the coffin to the ground.

Five years ago Mrs. Frey weighed 120 pounds. From some infection, believed to be the bite of an insect, she contracted elephantitis and began to increase in weight. She went to Bellevue Hospital for treatment several times, but failed to be cured.

Mrs. Frey is survived by her husband, John Frey, and by two sons, seven and five years old.

There will be a demonstration of the new land-clearing machine at the Donegan pasture, St. Cloud road, on June 26, 27 and 28, at 4:15 p. m.

VETERANS' ASS'N NOTES

By JOHN M. ANDERSON, Secretary

The association met in G. A. R. Hall, President Kenney in the chair. The usual national song, America, was sung, followed by a prayer and the Lord's prayer.

The secretary being absent no minutes were read.

Collection for hall, \$1.56.

Comrade Yeager led the social hour, and the following program was rendered:

File, violin and piano by Schofield, Andrist and Harrod—two excellent numbers.

Comrade Bledsoe gave two good selections on violin, accompanied by Miss Harrod.

Mr. Floyd Dingle played two fine tunes on the accordion—always good.

The choir, though good, rendered Tramp, Tramp, Tramp, the Boys Are Marching On, the audience swelling the chorus.

Comrade Andrist gave another se-

THIS WEEK'S PROGRAM AT THE PALM THEATRE

THURSDAY, June 21.—Darwin Carr and Neil Craig in "Millstones," a 2-reel drama. Mae Marsh in "The Tender Hearted Boy," a drama. "The Battle Royal," Vim comedy. "Far Away in the Kentucky Hills."

FRIDAY, June 22.—"Haunted and Hounded," 3-reel Knickerbocker feature. "Romance and Riot," the original Six Hopkins.

SATURDAY, June 23.—"Sin's Penalty," 3-reel Bowery feature. "Hot Stuff Gwendolyn," the sewing machine girl, a split reel comedy.

MONDAY, June 24.—The popular stars, Lillian Drew and Edward Arnold in "The Last Adventure," 3-reel drama. The world's most daring star, Helen Gibson, in "The Race For a Siding," an episode of the Hazards of Helen.

TUESDAY, June 25.—"One of the Pack," 2-reel drama. "The Selig Tribune," all of the latest news from the European battle front to the Mexican situation. "Ham and Preparedness," comedy.

WEDNESDAY, June 25.—"The Stampede," a Western picture of gold mines and Indians. "The Beauty Hunters," Photographs, matrimonial knot is tied over the phone. Confession ensues when they see the other face.

lection on the violin, accompanied by our Edith Harrod.

Comrade Sill, who always has something good, gave a selection from Richard the Third.

The program ended with reading of Reminiscences of the Sixth Army Corps by Comrade Yeager.

The introductions were:

J. L. Brown and wife; Comrade Brown was a soldier in Company E, 78th Ohio Infantry. He made a pleasing address, followed with a few words of greeting by Mrs. Brown. These people are looking for a permanent location, and say they think St. Cloud will be their home.

Although there was a threat of heavy rain the audience was much larger than is usual at this season.

Adjourned to meet Saturday, June 24th.

W. F. Kenney, Sec. Pro Tem.

W. C. T. U.

By MRS. CLARA E. KENNEY

The W. C. T. U. met in regular session Monday, June 19, at 2:30 p. m., with President Clara Kenney in the chair. After a temperance song Mrs. Beebe read the Scripture lesson, followed by prayer by the president.

After the usual routine the committee's report on constitution and by-laws was read and accepted.

The committee on food, etc., for the L. T. L.'s reported and was continued.

All the members of the L. T. L.'s are wanted at the M. E. church next Monday morning at 9 o'clock sharp, to complete arrangement for the July Fourth parade.

Mrs. Nighswonger, leader for the social hour being absent, the president took charge of it. Topic, "The Home in Line." The homemaker has so much dependent upon her. The ingredients used in the preparation of foods and drinks, and the way in which they are used. The mince pie of olden times was often given a dash of spirit, while the equally delicious mince pie of today is built on strictly temperance lines. A mother is not doing her duty who puts before her family such foods as will engender or stimulate a craving for strong drink.

Fruit juices came next for consideration. In response to a request from several of those present Mrs. Kirby gave her method of preparation of

fruit juice for a drink, about as follows:

Stem and wash the fruit, usually grapes; put in a preserving kettle with just water enough to cover; let it boil a few moments then pour into jelly bag to drain; return the juice to the kettle with about three cups of sugar to three pints of juice, and when it comes to a boil it is ready to can or bottle.

Mrs. Depew reported delicious jelly made from the small wild grape of this section, and after the juice was drained off the pulp was covered with water and again boiled. This juice, when sweetened made a delicious drink.

Many suggestions were given about using different kinds of fruit combined, such as grapefruit and berries, berries and guavas, etc., giving us ten different many valuable suggestions.

Our bodies are the temples God has given us wherein shall dwell that most precious of all things—the soul. Is it not a proof of wisdom that we study the structure of these temples and do all we can to prevent their decay or injury?

But the world is growing better. In our own America the great prohibition wave is slowly but surely rolling on. But we must take off our hats to Russia, who has banished their beloved drink, vodka. If a warm stimulant is required or permissible anywhere, surely cold, snow-covered Russia would be the place.

Kucheman Jewelry Co., of Bellevue, Ia., have on display in their show window a clock which has been in the Alexander Reed family for one hundred and fifty years. The clock came from Ireland, stands six feet tall, is made of black walnut, and is still in perfect time-keeping order.

The world's largest steel plate mill soon will be in operation in Pennsylvania and will be able to roll plates sixteen feet wide.

STEAMER

"Queen of the Lake"

WILL LEAVE ITS WHARF FOR LAKE EXCURSION Every Thursday at 2 P. M.

Also Sunday excursion. Vessel for charter for parties of 25 or more.

APPLY TO D. C. COPE, Owner, Penn. Ave.

Recruiting Station

A Recruiting Station will be opened in Kissimmee today and all persons desiring to enlist will please notify W. J. Steed, James M. Johnston or W. G. Hankins.

Company B of the National Guard State of Florida left last night for Black Point. The largest crowd that ever witnessed any departure from Kissimmee assembled to give the boys a rousing send-off.

EVERYTHING PRINTED IN THIS

FARM SECTION

IS OF INTEREST TO FARMERS

FLORIDA CITRUS EXCHANGE

The Florida Citrus Exchange recognizes the fact that the increasing production of oranges and grapefruit in Florida makes necessary that more people be taught to eat more of these fruits if grove operations are to become and continue profitable.

Alone among the marketing agencies, the Exchange has for years been conducting an educational campaign for Florida fruit. While of benefit to all growers in the State, this work brings greatest returns to those who ship under the Exchange trade-name Sealdsweet. Housewives more and more demand fruit that is so marked.

TEN LEADING VARIETIES OF COWPEAS DESCRIBED BY PROFESSOR ETHERIDGE

Among the numerous varieties of cowpeas, few are of commercial or agricultural importance. The ten leading varieties are described briefly by Dr. W. C. Etheridge, professor of agronomy in the University of Florida College of Agriculture.

The Whippoorwill is the most important variety grown in the country. More than half the acreage devoted to cowpeas in the United States is planted to this variety. It is medium early, of bushy growth, and easily distinguished by its seeds, which are kidney-shaped, buff colored and are speckled with brown. This is the best general purpose variety for forage and seed.—Agricultural News Service.

The Iron is resistant to root knot and wilt. The seeds are buff colored and angular. It is not a heavy producer, but the seeds are resistant to decay and for that reason it volunteers to a greater extent than any other variety.

The New Era is the earliest of all well known varieties. Seeds are buff colored and sprinkled with minute blue specks. It is bushy and makes a small vine growth. Its chief value is earliness.

A cross between the whippoorwill and new era, the groit, is considered one of the best forage varieties, especially in the northern part of the

cotton belt.

"Another variety which is resistant to wilt and root knot is the brabham. It is a cross between the iron and whippoorwill. It inherited the vigorous growth of the whippoorwill but not the heavy seedling. However, when compared with the other varieties it is a heavy seeder, especially on sandy soils. The seeds are buff, mottled with brown.

"Clay is the commercial name for all buff seeded cowpeas except iron. The several varieties are distinguished by the time required for ripening, which requires from 90 to 120 days. The later maturing varieties are known as wonder or unknown. None of the clay colored peas except iron are especially valuable.

"All black seeded peas are sold under the variety name of black. The common varieties under this group are the early black, which ripens seeds in about 70 days and the black which requires about 90 days. They are viney, of no great value for forage and seeds, but the seeds are resistant to decay, even in wet weather.

"There are about a half dozen varieties which are known as red ripper. None possesses outstanding merits. The early buff is a new variety which is popular where an early crop is desired. It has matured seeds in 65 days.

"Black eye peas are white with a black spot around the hilum or eye. Since they are not especially valuable for forage and seeds they are grown almost exclusively for human food."

The best cowpea for Florida is the whippoorwill, but where root knot or wilt is present brabham or iron should be shown.—Agricultural News Service.

Station Investigates Watermelon Diseases

Inquiries from several growers of various parts of the state indicate that watermelons are affected with diseases this spring. Dr. C. D. Sherbakoff, assistant plant pathologist to the University of Florida Experiment Station, found only two prominent diseases in a recent visit to some of the melon sections. These were blossom end rot and the wilt. Blossom end rot is probably due to the effect of sudden dry and hot weather, and is probably beyond control under present methods of culture.

The wilt is prevalent in many sections. It is caused by a fungus which can live in the soil about twelve years and hence infect new crops. It is introduced into the soil with the seed. Therefore, the only efficient methods of prevention are to disinfect the seed and practice crop rotation. For the treatment soak the seed ten minutes in a 1 to 1000 corrosive sublimate solution, rinse in clean water and plant immediately. Of course, it is too late to treat the seed this year but growers should note the effects of the disease now and resolve to prevent it next year.

That watermelons cannot be grown several years in succession on the same land is probably due to this disease. Wherever growers fail to treat their seed, several plants almost invariably show the trouble. Enough spores, therefore, are produced to exterminate the entire field. Plowing and harrowing scatters them so that they are ready to attack a large number of new plants. Even with seed treatment there will be a gradual increase of the trouble and crop rotation should be followed as an additional precaution.

Diseased plants which appear in the field should be pulled up carefully, to get all the roots, and destroyed where they stood. The ground should be treated with some fungicide, such as bluestone.—Agricultural News Service.

FOLLOW DIRECTION IN MAKING OR USING CATTLE DIP AS ADVISED BY THE ANIMAL INDUSTRIALIST

One Florida farmer lost three cows recently by arsenic poison. He was attempting to rid them of ticks and they absorbed the poison through their skins. Instead of dipping the animals or spraying them, as directions suggest, he applied the dip with a cloth.

Millet Makes a Good Summer Catch Crop

At various times through summer there are vacant spots on the farm, waiting for the season to plant some special crop. Dr. W. C. Etheridge, professor of agronomy in the University of Florida College of Agriculture, recommends that millet be sown on such land. It may be planted as a summer catch crop any time from the middle of April to sixty days before frost. German millet has always been used most in the South, although the common millet is often planted. German millet makes a larger yield than common, but the latter has a short season of growth and produces a better quality of hay.

Probably the best variety for common use would be the common, either the California or Gold Mine strain. These strains will make a yield of from two to five tons of good hay in from forty to ninety days, depending on the soil and season. All millets thrive well in hot weather and are resistant to drought.

Unless the land is in bad condition, the only preparation necessary can be accomplished with a cutaway harrow. Two to four pecks of seed will plant an acre. It may be sown broadcast or in drills.

Millet should be cut in early bloom for horses, but for cattle and sheep it may be left until the seed are in the late milk stage. Contrary to the common belief millet makes nutritious hay. Recent investigations have shown it equal and even superior to red clover, alfalfa, cowpea and timothy hay in beef production.

Millet hay cut after the seeds have formed has been found injurious to horses when fed in large quantities. It may cause kidney trouble and also lameness. For this reason, if intended for horses, it should be cut before the seed have formed, or if cut later it should be fed in small quantities and mixed with other feed. Millet will probably never be extensively used as a staple forage crop, but as a quick maturing summer catch crop it is very useful, and should take its place in Florida agriculture.—Agricultural News Service.

Chuck Hole Club Repairs Roads

"Most of the farmers and automobilists residing near Bothell, Washington, have formed an organization which is called the "Chuck Hole Club." Each member of the club pledges himself to boost the good roads movement in every way and to personally see that at least one chuck hole is filled up once a month."

Florida has many miles of shell sand-clay and graded dirt roads that have hundreds of these same chuck holes in them. If each farmer and automobilist would follow the example set by that progressive community in Washington, this state would soon have much better roads.

There is an old saying that "A stitch in time saves nine," and this applies forcibly to keeping up roads. When a small hole appears fill it up. Don't wait for the other fellow to do it, because a rain may come along before the other fellow does, and by washing the dust out leave a place for wheels to drop in and make the hole larger.

Rough roads are expensive for everyone traveling over them. Wagons suffer as well as automobiles. The strains soon rack the wheels, spring the axles and increase the draft of the wagon, thus making it much harder on the team.

Automobiles suffer more than wagons because they travel at a higher speed. Springs, axles, wheels and all parts suffer and the car is soon ready for the junk heap.

Dr. W. C. Etheridge, professor of agronomy in the University of Florida College of Agriculture, is very much in favor of the "Chuck Hole Club" idea and urges in addition that farmers use the King drag on the road along their property after each rain.—Agricultural News Service.

Either the dip was not diluted enough or it was rubbed too much into the animals' skins. John M. Scott, animal industrialist to the University of Florida Experiment Station, says that there is very little danger from arsenic poison when the dip is made and applied according to directions.

The following precautions concerning dipping are issued by the State Board of Health: Animals should not be dipped when they are overheated.

They should be watered before they are dipped so that they will not drink the dip. Animals should not be dipped during a rain unless they can be housed immediately upon coming out of the vat. They should not be turned on pasture until they have dried or the dip may fall upon the grass and kill grazing animals. Weak or pregnant animals should not be dipped, but should be sprayed or washed down.—Agricultural News Service.

LIVESTOCK MEN IN FLORIDA WANT TO KNOW ABOUT TICK AND DIP

Interest in tick eradication is growing steadily in Florida. John M. Scott, animal industrialist to the University of Florida Experiment Station, sent inquiries to several hundred livestock men a few weeks ago to learn if they desired a livestock institute at the University. They were asked to suggest topics which they would like discussed. Mr. Scott says that at least ninety per cent of those who replied wanted information on dipping vats and tick eradication.

The livestock institute will be held some time next fall. Every man who has replied has been in favor of the meeting. A few have said that they would be unable to attend on account of the great distance, but the present tenor indicates that there will be a good attendance. The date has not been definitely settled and will not be until the best time for the majority can be selected.—Agricultural News Service.

be until the best time for the majority can be selected.—Agricultural News Service.

Save Farm Manures

During the present potato famine it is necessary for every farmer to conserve carefully all the farm manures produced. It is a well known fact that farm manures contain a large proportion of the potash that was originally in the plants consumed by animals. The amount of potash in the manure varies directly with the amount in the plants. Those animals fond of plants running high in potash produce a manure running high in this element. Goat manure is a striking illustration. Animals fond of plants running high in ammonia produce a manure high in ammonia. Horse and cattle manure are in this class. Poultry manure runs high in ammonia and phosphoric acid.

Would You Avoid Redbugs?

The first lap of the annual scratch is scheduled to begin soon after you make the first trip to the blackberry patch. Although the Bureau of Crop Estimates has not reported the acreage of redbugs this year, a personal exposition will convince anyone that the crop is plentiful. This is one crop with which no problems of distribution are connected, as a self-conducted tour among the habitations of this sociable organism will prove.

J. R. Watson, entomologist to the University of Florida Experiment Station, suggests the following precautions for those who are wont to wander through neglected fields, briar patches, shrubbery and weeds. A bath in hot water containing plenty of soap or salt, after one has visited the foregoing haunts of redbugs, will rid him of their company. Probably the best method is to dust flour of sulphur in the stockings, around the belt and on parts of the body or the clothing which are apt to collect redbugs. Naphthalene may be used instead of sulphur.

Itching may be relieved by application of ammonia, soda, a 6 per cent solution of formalin, alcohol, camphor or peppermint to the swollen places. Redbugs do not stay on human beings long because man is not their natural host. Those who are unaccustomed to entertaining them need not be alarmed at the first attack. Eventually they will not demand so much attention.—Agricultural News Service.

The market likes fancy packages. It will pay as readily for a pig or cow in a fancy package as it will for a trim basket of fruit. Put sleek coats and smooth finish on your animals.—Agricultural News Service.

Club Boy Demonstrates the Value of Level Cultivation

As long as soil can be thrown up in a ridge, some folks will persist in riding corn. It is doubtful, however, if one Sumner county man will follow such practices after this year. This particular farmer had his land bedded for cucumbers. He planted corn on the beds when the cucumbers were taken off.

Fortunately his son, a corn club boy, selected an acre close to the cucumber field. The boy is following demonstration methods in the culture of that acre, and is giving level cultivation. G. L. Herrington, boys' club agent for the University of Florida Extension Division, reports that the boy's acre is at least 100 per cent better than his dad's on adjoining land.—Agricultural News Service.

OUR COUNTRY'S FLAG

(Read at Flag Day Exercises at Central High School, Washington, D. C.)
 Say! Do you know what means that flag
 Throughout this happy land unfurled,
 From mast and tower and mountain crag
 Its greeting waving to the world?
 And can you read its story true,
 Between its lines of red and white?
 And do its stars, in heavenly blue,
 Make plain its mission with their light?
 It means that this is God's own land;
 That here His love and law will stay;
 The brightest of each soul will stand
 To worship God in its own way;
 That each one's rights shall be above
 The power of greed, the might of gold;
 That truth and pure, unsullied love
 Our feet in flowery paths will hold.

And here no despot with a breath
 Can start the cruel flames of war,
 When millions rush to fiery death
 And know not what the fight is for!
 But here will freemen gladly arm
 And with the strength of freemen fight
 To shield the hearth and home from harm
 And vindicate their freedom's might!

Oh, Liberty! Divinest gift,
 That God has rendered unto man!
 The essence that alone can lift
 The soul to heights heaven's arches span!
 How sweet thy breath upon the air
 That floats beneath thy lovely flag!
 And shall a dastard mortal dare
 Thy heaven-lit stars to darkness drag?

Niagara's thunder answers "No!"
 While Minnehaha's echoes chime;
 Yosemite's clear waters go
 To spray in negative sublime;
 And millions make their vows anew
 To ever by that banner stand;
 That on the soil of freedom grew
 To wave its blessing to the land!

Star Spangled Banner! Flag of light!
 The glory of a nation's love!
 For thee each heart and hand would fight,
 With angels cheering from above!
 For Liberty and Love and Light
 Are what thy glorious colors mean;
 And these are heaven's, and heaven's
 own might.

Should peril come, would intervene!
 —Thomas Calver.

Mute Wedding

Daytona, Fla., June 9.—How would you perform a wedding ceremony where both of the contracting parties are mutes? This was the problem that confronted Miss Sadie Hiserodt, clerk in the office of County Judge J. Lee McCrory last Friday, when Eugene Hogle, of Omaha, Nebraska, and Miss Lily Golden Holland, of Daytona Beach, secured a marriage license and requested Miss Hiserodt by virtue of her office as notary public to perform the ceremony. Not to be thwarted Miss Hiserodt wrote out the form of the ceremony on a typewriter and gave each of the contracting parties a copy of the ceremonial form. She then went through the ceremony the same as if

NOTICE OF APPLICATION FOR
TAX DEED UNDER SECTION
574 AND 575, GENERAL STAT-
UTES OF THE STATE OF
FLORIDA.

Notice is hereby given that Foster Newton, purchaser of Tax Certificates Nos. 362, 364, 365, 366 and 227, dated 7th day of July, A. D. 1913, has filed said certificates in my office and has made application for Tax Deed to issue in accordance to law. Said certificates embrace the following lands in Osceola county, Florida:

Lots 34, 47, 50, 63, 78, 84 and 98 of Seminole Land and Investment Company's Subdivision of Section 14, Township 26 South, Range 30 East, and Lot 40 of Seminole Land and Investment Company's Subdivision of Section 4, Township 27 South, Range 31 East.

The said lands being assessed in the name of: G. B. Caldwell; W. W. Kenney; Unknown; W. P. Treadwell and Unknown.

Unless said Tax Certificates are redeemed according to law, Tax Deed will issue thereon on the 15th day of July, A. D. 1916.

Witness my hand and official seal at Kissimmee, Florida, this 12th day of June, A. D. 1916.

The State of Florida.

NOTICE TO SHOW CAUSE

To the Taxpayers and Citizens of
Special Road and Bridge District
No. 2, Osceola County, Florida:

You are hereby notified and required to show cause, if any you have, before his honor, James W. Perkins, at his office in DeLand, Florida, on July 7th, 1916, at 2 o'clock p. m., why the bonds in the above mentioned action should not be validated and confirmed, according to the statutes in such case made and provided.

J. L. OVERSTREET,
Clerk of Said Court.

42-41

AN ORDINANCE

An Ordinance Providing For the
Cleaning Up of Certain Lots and
Assessing the Cost Thereof Against
the Lots.

Be it Ordained by the City Council
of the City of St. Cloud, Florida:

Section 1. That all lots hereinafter
named shall be cleaned up and put
in proper condition on or before the
25th day of July, A. D. 1916.

Section 2. That the owners of said
lots who fail to comply with the
provisions of Section 1 of this Ordinance
shall be deemed to be in default and
the city shall have the power to se-
cure the performance of said work
at the approximate costs per lot as
shown by amounts opposite lots here-
inafter named, and assess such several
amounts as a lien against the several
lots.

Section 3. That the city council
shall meet at 10:00 a. m. on the 15th
day of July, 1916, at the city hall for
the purpose of hearing objections
from any person owning or interested
in any of the lots hereinafter described
to be specially assessed, and any
owner or person interested in said
lots who does not at such meeting
present his objections in writing to
the enforcement of this ordinance
shall be deemed to have consented to
its provisions.

Section 4. That the city treasurer
shall be authorized to issue special as-
sessment certificates payable in six
months at the rate of 8 per cent in-
terest per annum for the purpose of
raising funds with which to pay for
work done on defaulting property
owners' land.

Section 5. That the city council
have the power to contract for the

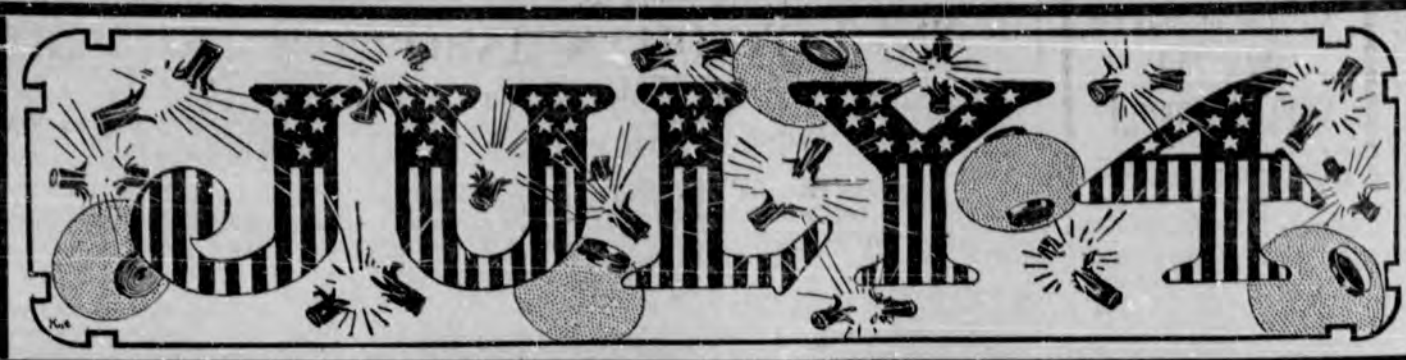

performance of work on each lot sepa-
rately or any number of lots, pro-
vided that when any contract shall ex-
ceed fifty dollars, the city shall ad-
vertise for bids and let the contract
to the lowest responsible bidder. All
bids to be accompanied by a certified
check covering five per cent of said
bid.

Section 6. That as soon as practi-
cable after the completion of said
work the city council shall by a reso-
lution fix a special assessment against
the property cleaned up at an amount
not exceeding the actual cost of the
work or the estimated special assess-
ment stated therein, which special as-
sessment shall constitute a lien
against said property against which
it is assessed, prior to all liens ex-
cept taxes.

Section 7. That should it become
necessary to collect any of the special
assessments herein named through an
attorney or by suit, a reasonable at-
torney's fee shall be assessed against
the property on which such special as-
sessment has been made in addition
to the said assessment herein provided
for.

Section 9. The lots hereinbefore
referred to and ordered in Section 1
to be cleaned up and put in proper
condition are as follows, and the es-
timated costs of cleaning up and putting
in proper condition are shown oppo-
site the several lots as follows:

Lots	Block	Cost
13, 14 and 15	172	\$5.00
12	173	3.00

Other prizes also will be given to the winners of Bicycle Races, Foot Races, Sack Races, Night Shirt and several other contests. And don't forget the Ball Game between the Old Maids and Old Bachelors. This will be a hilarious Scream and worth any man's time.

OLD MAIDS VS. OLD BACHELORS

Old Maids and Old Bachelors will play baseball in costume, all masked. Something very funny.

Also Various Field Sports.

Oration in afternoon and Band Concert in Park—Band Concert in evening and Dancing at Lake Front

EXCURSION BOATS ON LAKE AND AN ALL-DAY GOOD TIME. ALL WELCOME

Tallest Flag Pole For Long Island

Northport, L. I.—Joseph T. Lilly, president of the Norton-Lilly Steamship Company is to have erected at his country home here the tallest flag pole along the Atlantic coast. The pole is 165 feet long and 28 inches at its base. It is from an Oregon fir tree which stood three hundred feet high. Mr. Lilly's place stands on a hill 200 feet above sea level. From its height of 350 feet it is believed the flag will be seen almost the entire length of Long Island.

The Tile Fish

As a table delicacy the tile fish has established itself under the exploitation of the Bureau of Fisheries, which undertook to bring its merits to the attention of the public a short time ago, says the Indianapolis News. The fish are now marketed in great quantities and are to be found on sale in all the leading markets of the eastern part of the country, so that the government's efforts in introducing it have been eminently successful.

Twain's Teacher Dead at 98

Capt. Abner Martin, aged 96, who as a pilot before the war between the states taught Samuel Clemens (Mark Twain) to navigate the Mississippi river, is dead at his home in New Liverpool, Ohio.

Capt. Martin was well known as a river man. He was chief mate of the Pennsylvania when that packet was wrecked by an explosion near Memphis and 260 persons were killed. He also was in charge of troop packets on Southern rivers for the Northern government at the outbreak of the war.

Short of Red Tape

Owing to the lack of necessary dyes, there will soon be no more red tape available for the War Office and elsewhere, says Punch. It is to be hoped, however, that the familiar and picturesque salutation with which the staff officers are in the habit of taking leave of one another, "So long, Old Tape," will not be allowed to become obsolete.

WANTED REST

An old farmer who had been henpecked all his life was about to die. His wife felt it her duty to offer him such consolation as she might, and said, "John, you are about to go, but I will follow you."

"I suppose so, Maria," said the old man weakly, "but as far as I am concerned, you needn't be in any blamed hurry about it."—Boston Transcript.

ALL IN A TWINKLING

A lady who had just received an interesting bit of news said to her little daughter: "Marjorie, dear, aunte has a new baby, and now mama is the baby's aunt, papa is the baby's uncle and you are her little cousin." "Well," said Marjorie, wondering, "wasn't that arranged quick?"—Boston Transcript.

Old Papers

Worth Double

Old papers are worth double what they were a year ago, and it will pay the thrifty housewife to carefully save all the old papers which come into the house. These must be neatly folded and preserved in bundle of 50 or more. Remember that crumpled papers are of no value. If the paper famine continues it is possible that these old papers may yet be worth \$25 a ton. Really the paper situation in America is getting to be serious.—Gainesville Sun.

Reasons for Declining

The sweet young thing rose with a becoming blush and offered her place in the crowded tramcar to the man in the blue suit, says the Fall Mall Gazette.

"Won't you take my seat," she said shyly.

"No thank you, Miss," was the wounded one's unexpected reply. "I've been roller skating all the afternoon and I'm tired of sitting down."
